

In the **7th** round of data collection, **29 African** countries were surveyed on various aspects of contraceptive security.

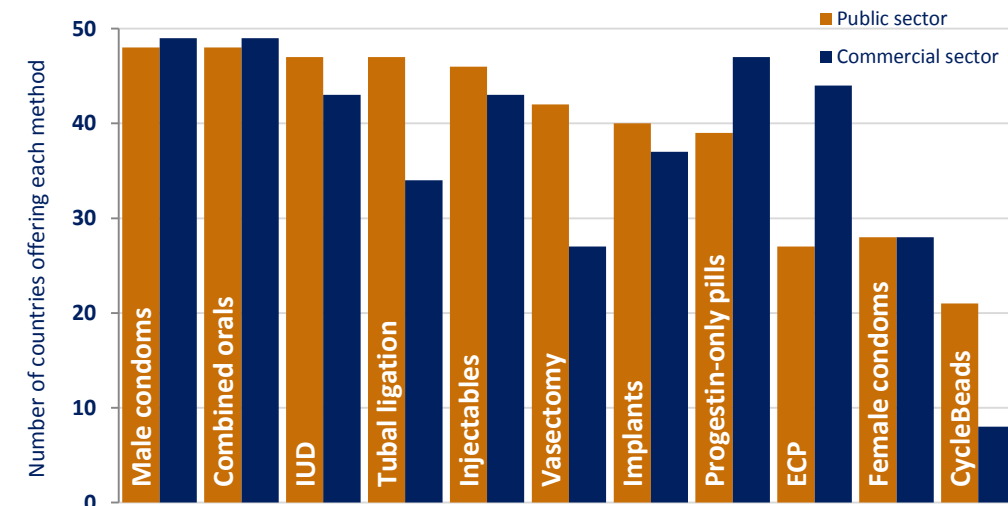

58% of countries spent **government funds** to buy contraceptives

On average, countries offer:

9 methods in the **public sector** and **8** methods in the **commercial sector**

97% of countries have a **committee** that works on CS

Data was provided by many survey respondents, including USAID missions, ministries of health, USAID | DELIVER PROJECT field offices, and additional in-country partners.

This dashboard was produced with support from the U.S. Agency for International Development, through Task Order 4 of the USAID | DELIVER PROJECT, under contract no. GPO-I-00-06-00007-00.

Contraceptive Security Indicators 2015 Global Data Dashboard

Introduction and Purpose:

Through the *Contraceptive Security (CS) Indicators*, countries can track a comprehensive set of indicators that reflect key aspects of CS. In-country and global stakeholders can use these indicators to monitor CS status and trends for programmatic and advocacy purposes.

This dashboard presents an overview of *CS Indicators* data for the 29 African countries surveyed in 2015 during the 7th round of data collection. In total, 49 countries were surveyed.

Data sources:

The Indicators were designed to routinely capture readily available information through a key informant survey. Country respondents are mainly USAID Mission and USAID | DELIVER PROJECT staff, often with input from the Ministry of Health and other partners.

Additional Resources:

Resources from all years of data collection (2009-2015) can be found on the USAID | DELIVER PROJECT website:

Maps

Presentations

Finance and Procurement (Capital)

- Dollar value of estimated need for contraceptives to be procured for the public sector
- Existence of a government budget line item for contraceptives
- Amount government allocated for contraceptives
- Amount government spent on contraceptives
- Value of in-kind contraceptive donations and Global Fund grants used for contraceptives for the public sector
- Information on existence of a funding gap
- Information about the government's procurement mechanism

Commodities

- Range of contraceptive methods offered in public facilities, private facilities, NGO facilities, and through social marketing

Policies (Commitment)

- Existence of a national CS strategy
- Inclusion of contraceptives on the National Essential Medicines List
- Inclusion of CS and family planning (FP) information in the Poverty Reduction Strategy Paper
- Existence of policies limiting or promoting access to FP

Coordination and Leadership

- Existence of a national committee that works on contraceptive security and types of organizations represented
- Frequency of committee meetings
- Legal status of the committee
- Existence of a CS "Champion"

Supply Chain (Capacity)

- Stockout information at the central level
- Whether stockouts are a serious problem at the service delivery point and/or central level
