**JSI’S IN-COUNTRY SUPPLY CHAIN ACTIVITIES**

**AFRICA**

**ETHIOPIA**
- Strengthen vaccine supply chain including electronic management information system (eLMIS), support pharmaceutical regulatory systems and adoption of GS1 standards, strengthen supply chain (SC) data visibility and use, support eLMIS for refugee camps

**GUINEA**
- Provide maintenance support for MOH eLMIS, OpenLMIS; immunization SC design work

**KENYA**
- Support new contraceptive product scale-up and support organizations in the region working in humanitarian settings to strengthen their health supply chain practices; in partnership with JSI affiliate Insupply Health: improve SC data use and performance through IMPACT* Teams, support remote temperature monitoring, develop community-level mobile reporting and innovative approaches to managing supplies for migratory populations, and develop online games to grow health knowledge and skills

**MADAGASCAR**
- Support new contraceptive product introduction and scale-up, conduct immunization supply chain design analysis

**NIGER**
- Support immunization SC design to improve efficiency and performance; provide on-going technical assistance to the logistics team of the immunization program

**NIGERIA**
- Support new contraceptive product introduction and scale-up; Support organizations in the region working in humanitarian settings to strengthen their health supply chain practices

**SOUTH AFRICA**
- Provide procurement agent services for HIV commodities through the Partnership for Supply Chain Management (PFSCM)

**TANZANIA**
- Develop and rollout a vaccine information management system in Tanzania and Zanzibar including development of vaccine warehouse management system module; strengthen eLMIS and data analysis/use/oversight; train facility staff on remote temperature monitoring devices; conduct country-wide transport route optimization analyses

**ZAMBIA**
- Support implementation of MOH eLMIS; build capacity in data use at central, regional, and district levels; build an e-learning platform for eLMIS users

**INDONESIA**
- Support new contraceptive product scale-up and implementation of RH SC, including computerized eLMIS at facility and township levels and IMPACT* Teams at health facility, township and state/region level

**REGIONAL: INSUPPLY HEALTH LTD.**
- Nairobi-based, East African public health advisory firm affiliated with JSI, designs user-centered, optimized SC solutions for essential health products

**JSI PROJECTS**
- Supply Chain Projects
- Other Health Projects

**MIDDLE EAST**

**IRAQ**
- Support organizations working in humanitarian settings to strengthen their health supply chain practices

**JORDAN**
- Support organizations in the region working in humanitarian settings to strengthen their health supply chain practices

**PACIFIC**

**PACIFIC ISLAND COUNTRIES & TERRITORIES**
- Support capacity building to improve use of data for program management and SC management while strengthening and updating the SC design to ensure end-to-end data visibility and better use of data to reduce supply disruption

**JSI’S IN-COUNTRY SUPPLY CHAIN ACTIVITIES**

John Snow, Inc. (JSI) manages health supply chain projects worldwide in support of a range of program areas.

---

**PROGRAM/FOCUS AREAS**

- Malaria
- Maternal, Neonatal & Child Health
- TB
- Labs
- Immunization
- Family Planning
- HIV
- Essential Medicines
- Infection Protection
- Autonomous Aerial Systems (AAS)
- Nutrition
- Non-Health Commodity
- Cardiovascular Diseases
- Humanitarian

---

**JSI PROJECTS**

- Supply Chain Projects
- Other Health Projects
