BULLETIN

November 06. 2020

Rapid Immunization Skill Enhancement (RISE) is a complementary capacity building package to strengthen the ongoing training of frontline health workers engaged in routine immunization under Universal Immunization Program of Government of India. This user-centric model optimally leverages the high technology (mobile phone, internet) penetration among the health workforce and effectively uses a digital training content supported by a face-to-face component of mentoring by supervisors. The digital part is primarily self-learning through an objective focused content based on adult learning principles that engages the learners through a variety of audio, animated visuals, reading and interactions like learning games and quizzes. It also has a provision of objectively assessing the learning and certification to make it more attractive to the learners. An open source Learning Management System (LMS) has been custom made to manage and deliver this digital content and provide a real-time monitoring dashboard which enables problem-solving and mentoring by supervisors. The dashboard is the basis of the bulletin on RISE updates.

Story from Field

"RISE" abled to evolved to knowledge

Dr. Soumya Das Patnaik
Superintendent, CHC Balugaon
Khordha District, Odisha

"Since its launch, RISE has been a very convenient and smart tool for learning about immunization. All the health care providers including doctors as well have been able to improve upon their knowledge through the application. All the modules are well organized, Visuals are enticing and drives desire to learn. Questions in the form of quiz have helped fathom the depth of knowledge and improve it".

"Overall, RISE is a huge revelation that is making everybody proficient with immunization knowledge & skill and ultimately enable them to provide more efficient and effective service to the society."
